

Demographic Analysis

A standard set of demographic questions is included with each assessment. These questions include gender, ethnic category, age group, training background, and years of experience. If these questions are answered by the test taker, an analysis of scores by demographic category can be reported. The Whitener Group also offers customized test development clients the option to create customized demographic questions allowing you to capture valuable information.

Test Title	FEMALES			MALES		
	Number Taking Assessment	Number Meeting 65%	Percentage Meeting 65%	Number Taking Assessment	Number Meeting 65%	Percentage Meeting 65%
